(57) **ABSTRACT**

A bolt mechanism comprising a backing plate adapted to be mounted on a complementary surface of a flat panel, a bolt assembly housing attached to the backing plate, a sliding bolt assembly carried on the bolt assembly housing one end of which has a bolt mechanism adapted to engage and latch to a striker, a spring on the housing for keeping the end of the bolt extending out of the bolt assembly housing, the backing plate being adapted for attachment to and detachment from an actuator housing assembly.
